*Temperature Monitoring at Your Fingertips!*

PROTECT YOUR  
**BRAND AND  
REPUTATION**  
WITH E-CONTROL SYSTEMS!

Food Service

# Why ECS?

## ROI

- Prevention: Helps eliminate or minimize product loss
- Replacement Costs: Preventing loss saves costs associated with replacing product
- Brand Image: Knowing cabinet temperatures ensures product is served at peak quality
- Food Safety Data: Data stored in compliance with HACCP and FDA is readily available during audits
- Predictive Analytics: Review of cabinet performance allows pro-active remedies to ensure optimal operations

## VIEW OPERATION FROM A SINGLE DASHBOARD

E-Control Systems, Inc. was founded in 1998 and is a privately held corporation headquartered in Sherman Oaks, California. With Over 5,000 Installs throughout the country, E-Control Systems is the industry leader in wireless temperature monitoring solutions.

## WHAT WE MONITOR

- Walk-ins (Temp & Door)
- Reach-ins
- Holding Units (Hot & Cold)
- Prep Tables (Temperature & Compressor Run-Time)
- Milk Shake/Ice Cream Machines (Temperature)
- Under-Counter Units
- CO<sub>2</sub> Tanks (CO<sub>2</sub> Tank Pressure)
- Hot Water Heater – Water Temp for Sanitation
- Dry Storage (Temp & Humidity)
- Power Interruption
- Food Temperatures (IntelliCheck™)

INTELLICHECK™

INTELLIGATE™

Available in both ZigBee® and Wi-Fi.

INTELLISENSOR™

## ECS CLOUD

- Secure, Private Cloud
- Server Redundancy
- Automatic Backups, makes sure that data is never lost

With E-Control Systems' hosted solution in the cloud, all of your data is stored securely in the cloud and available for you to view 24/7 from any computer, smart phone, or tablet. Besides being able to view your operation from anywhere, at any time, some of the benefits of our hosted solution in the cloud include: (1) Never having to worry about costly server space, or if your server goes down; (2) E-Control Systems can act as an extra set of eyes, should a problem arise; (3) No need to ever upgrade software.

ECS Cloud-based storage helps you store your critical data securely. Data is stored in our secure private cloud with server redundancy and automated system backups, making sure that your valuable data is never lost. Besides never having to worry about losing data due to a system failure, with our secure cloud, your IT resources are not impacted.
